

# Abdulmalik Bajandouh

AI Product Builder

Makkah, Saudi Arabia | [abdulmalik.bajandouh@gmail.com](mailto:abdulmalik.bajandouh@gmail.com) | +966 54 976 0581  
[linkedin.com/in/abdulmalik-bajandouh](https://linkedin.com/in/abdulmalik-bajandouh) | [github.com/ABDULMALIK0001](https://github.com/ABDULMALIK0001)

## SUMMARY

Data Science graduate who builds complete AI products - from the model to the deployed app. Focused on LLM applications, retrieval-augmented generation (RAG), AI agents, and full-stack engineering, on a foundation of machine learning and Python.

## SKILLS

|                   |                                                                                                                                                                                                                                  |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Frontend          | HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS                                                                                                                                                                  |
| Backend & Systems | Python, Node.js, Java, REST APIs, PostgreSQL, Redis, Prisma, Docker, Git, Auth.js, CI/CD                                                                                                                                         |
| AI & Full-Stack   | LLM Providers (Gemini, Claude, ChatGPT), Prompt Engineering, RAG, Embeddings, Tool Calling, AI Agents, Automation, Vercel AI SDK, Vector Databases, LangChain, Hugging Face, Fine-tuning (LoRA/QLoRA), MCP, Scikit-learn, Pandas |
| Soft Skills       | Communication, Problem-Solving, Adaptability, Learning Agility, Teamwork, Focus                                                                                                                                                  |

## PROJECTS

### VitaVision

*Python, Scikit-learn, Random Forest, Pandas, Streamlit*

Built an end-to-end machine-learning platform that predicts deficiencies across 12 vitamins and minerals from blood-test data (NHANES) - full pipeline from data cleaning and model training to a deployed, bilingual web app.

### AI Resume Analyzer

*Next.js, TypeScript, Gemini, Tailwind CSS*

Full-stack AI app that analyzes a resume and returns an overall score, ATS-readiness check, and concrete rewrite suggestions using an LLM with structured JSON output.

### Chat with your PDF (Advanced RAG)

*Next.js, Gemini Embeddings, RAG, TypeScript*

Document-chat app with a full retrieval-augmented-generation pipeline: semantic retrieval, LLM-based reranking, query rewriting, and streamed answers with inline page citations.

### JobTrack - Full-Stack SaaS

*Next.js, Prisma, PostgreSQL, Redis, Auth.js, Docker*

Dockerized job-application tracker with a drag-and-drop Kanban board, authentication, rate-limiting, and a PostgreSQL/Redis backend - orchestrated with Docker Compose.

## EDUCATION

|                                |             |
|--------------------------------|-------------|
| <b>B.Sc. in Data Science</b>   | <b>2026</b> |
| Umm Al-Qura University, Makkah |             |

## CERTIFICATIONS

- Machine Learning Specialization - DeepLearning.AI & Stanford
- Generative AI with Large Language Models - DeepLearning.AI & AWS
- Meta Front-End Developer Professional Certificate - Meta

## LANGUAGES

Arabic  
English
